Please remember that this is a wellness schedule and if your pet ever becomes ill, additional examinations and diagnostic tests will be necessary.

Seventy-five percent of pets over the age of three have dental disease. Dogs and cats are not supposed to have bad breath. Dental plaque, oral diseases, and other conditions can cause bad breath. Brushing your pet's teeth and having regular dental cleanings are beneficial for your pet and your pocketbook. Advanced dental diseases can be painful to your pet and costly to treat.

1-7 Years

- _____ Annual or twice yearly exam as needed
- _____ Weight _____
- _____ Body Condition Score _____
- _____ Nutritional assessment
- _____ Behavior assessment
- _____ Submit fecal sample if cat goes outside or lives with a dog
